Project Title: Smart Student Health & Career Support System (SSHCS)

---

1. Project Overview

The Smart Student Health & Career Support System (SSHCS) is an integrated campus-focused digital platform designed to support students in four key areas:

• User & identity management
• Doctor appointment & prescription handling
• Smart delivery management
• AI-powered business & career support chatbot

This system combines healthcare access, delivery services, feedback intelligence, and AI-driven academic/career guidance into one centralized student platform.

The main objective is to improve student convenience, health accessibility, academic direction, and campus service efficiency.

---

2. System Workflow Overview

Step 1 – User Registration & Login
Students, delivery persons, and vendors (pharmacies, grocery shop owners) register and log in.

Step 2 – Service Selection
Students choose:
• Book Doctor Appointment
• Upload Prescription
• Place Delivery Order
• Use AI Career/Business Chatbot

Step 3 – Service Processing
• Doctors approve appointments
• Prescriptions are uploaded to selected pharmacies
• Orders are placed and auto-assigned to delivery personnel
• Chatbot evaluates and generates roadmap

Step 4 – Delivery & Feedback
• Order tracking available
• Payment calculation includes delivery charge
• Users rate delivery persons and vendors

• Sentiment analysis processes feedback
• Complaint management system handles issues

---

3. Core Functional Modules

Function 1: Intelligent User & Trust Management System

This module manages all user types and ensures transparency and trust.

User Types:
• Students
• Delivery Personnel
• Vendors (Pharmacies & Grocery Shop Owners)

Functional Requirements:
• User registration & role-based access control
• Profile management
• Feedback & rating system for delivery persons and vendors
• Sentiment analysis on student feedback
• Complaint submission and resolution tracking
• Performance scoring for delivery personnel

Student Benefits:
• Secure and verified service providers
• Ability to rate and review services
• Issues resolved through structured complaint system
• Transparent service quality monitoring

Function 2: Smart Doctor Appointment & Prescription Management System

This module digitalizes campus medical support.

Functional Requirements:
• Doctor selection interface
• Time-slot based appointment booking
• Doctor approval system
• Appointment status notifications
• Prescription upload feature
• Direct prescription sharing with selected pharmacy

Workflow:
Student → Select Doctor → Choose Time → Doctor Approval → Upload Prescription → Send to Pharmacy

Student Benefits:
• Easy medical access
• Reduced waiting time
• Secure digital prescription handling
• Direct pharmacy integration

Function 3: Automated Delivery & Order Management System

This module manages product ordering and logistics.

Functional Requirements:
• Place order from pharmacy or grocery vendor
• Automatic payment calculation (including delivery charge)
• Auto-assignment of delivery personnel
• Real-time order tracking
• Delivery status notifications
• Order history tracking

Workflow:
Student → Place Order → Payment Calculation → Auto Assign Delivery Person → Order Tracking → Delivery Confirmation → Rating

Student Benefits:
• Fast and organized delivery system
• Transparent pricing
• Reliable and trackable service
• Convenience within campus

Function 4: AI-Based Academic & Business Support System

This module provides intelligent career and entrepreneurship guidance using a trained chatbot.

Functional Requirements:
• Student identity analysis (Year, Semester, Degree, GPA, Specialization)
• Category selection (e.g., Business Analysis, Entrepreneurship, Career Path)
• Knowledge assessment quiz
• Interactive Q&A session

• Personalized roadmap generation
• Chatbot trained using campus study materials and academic resources

Workflow:
Student Identification → Category Selection → Knowledge Quiz → Q&A Interaction → Roadmap Generation

Student Benefits:
• Personalized academic guidance
• Career clarity and structured roadmap
• Skill gap identification
• Entrepreneurial support
• 24/7 AI-based academic assistant

---

4. Overall Student Benefits

• Integrated health, delivery, and career support in one platform
• Reduced time and effort
• Improved medical accessibility
• Secure digital prescription handling
• Transparent rating and complaint system
• AI-powered academic and career growth support
• Campus-focused intelligent ecosystem
